CATION RESIN

Aquatrol CAT100E cation resin

provides a high purity, premium cation resin designed for the treatment of foods, beverages, potable waters, and water used in the processing of food. Aquatrol CAT100E resin is a high grade resin which complies with the U.S. Food & Drug Administration (USFDA) CFR 21, Title 173.25 for use in the treatment of foods for human consumption.

Aquatrol CAT100E cation resin

has excellent hydraulic characteristics for optimal flow rate and backwash flow rates. Its high capacity and porosity characteristic provide exceptional kinetic behavior along with good physical, chemical and thermal stability.

Chemical and thermal stability

Aquatrol CAT100E is insoluble in dilute or moderately concentrated acids, alkalis, and in all common solvents. Thermally stable to higher than 248°F (120°C) in alkali's such as, sodium or alkaline earth like calcium and magnesium salt forms.
